Drayton Valley Hospital

Drayton Valley Hospital finished one full year of operation on August 8th of this year with a total of 1663 in patients for the year and 693 out patients. 207 babies were born in the hospital during the year.

Since the first of this year the hospital has operated 99.7% of capacity which is said to be much higher than it should be, and points up the necessity for a new addition to the building. Drayton Valley has grown much faster than was at first contemplated and the twenty-bed hospital has become much too small to serve this district adequately.

PEMBINA NEWS ADVERTISER

Vol. 4 No. 33 August 20, 1959 A. Playford, Publisher Box 120 Drayton Valley, Alta.

Lodgepole Highway

It was announced recently that work is to start immediately on the program to rebuild the road from Drayton Valley to Lodgepole and north from Lodgepole to Chip Lake. Special appropriations have been made, according to the announcement from the Highways Department for both that road and the road from Lodgepole to the Big Bend Campsite, which is now being surveyed with clearing also underway now on the road to the dam. The Drayton Valley-Lodgepole-Chip Lake Highway will be brought up to the standards of a Class A Secondary Highway.

An air-strip is to be cleared at the damsite also, and announcement was made recently that a lumber yard and planes mill may be put into operation in Lodgepole in the near future. The site has already been selected and probably will be approved soon.

STORES IN LODGEPOLE CLOSE AT SIX P.M.
Effective August 1st the Lodgepole stores all close at six o'clock except on Monday and Friday nights. Last Friday, August 1st, the stores closed at six, however, to take part in the community doing in the Territorial Association Ball Park. Starting at 6:30 there was a ball game between Lodgepole Junior and Drayton Valley Juniors which Drayton Valley won, following the ball game the community enjoyed a winner roast at the park, which was followed by an open-air dance in the park.

An addition to the Lodgepole school is under construction.

CYNTHIA SCHOOL DISTRICT PURCHASES NEW BUS
The Cynthia School District recently purchased a new 35 passenger G.M.C. school bus to bring children from Cynthia district to the school in Lodgepole.

"Donkey" Ball

"Waiting in the dark in the Park."

Drayton Valley Elks Lodge staged an hilarious game of "Donkey" Ball on a recent Monday night when a number of the long-eared and shaggy little creatures were brought in for the game. According to the rules of the game only the pitcher and the catcher stood on their own two feet; all other players had to ride a donkey as they played the game. Much oil and supply were used on the opposing teams, but each team had players from other teams. Rain and mud did not dampen the enthusiasm of the players. Their

movements were rather uncoordinated about the whole project to start with. When darkness fell on the scene lights were turned on in the many cars around the ball diamond and the game proceeded. In the pictures players may be seen using their mouths to better speed or waiting aside their donkeys, waiting for the play to come their way. The game ended after an hour of play with a win 1-0 for Supply when Ken MacKenzie coasted his sturdy little mount around the bases and back to home plate.

"The Lone Ranger rides again."

Personalities in Review

Adrian Meier, Insurance Agent, Mayor of Drayton Valley.

DRAYTON VALLEY & DISTRICT PERSONALITIES IN REVIEW

Born and raised on a wheat farm at Tramping Lake, Saskatchewan, (Near Kenosha, Sask.) Mr. Meier attended school at Wilkie and Edmonton, where he took an accounting course. He entered the Army in February 1942 and saw service in the Army for exactly four years, being discharged in February, 1946. He married Margot de Kergommesaux and Esplanade, where he took an accounting course. He served as president of the Chamber of Commerce for two years, representing in 1947 on the board for the Town of Drayton Valley. An avid sportsman, he is a member of the Drayton Valley Curling Club. He is a member of the Lions Club and other organizations in Drayton Valley.

vision for three and a half years. In 1950 he moved to Redwater, Alberta and established his own accounting business. In 1954 the Meiers moved to Drayton Valley and Mr. Meier established his present insurance and real estate business. He served as president of the Chamber of Commerce for two years, representing in 1947 on the board for the Town of Drayton Valley. An avid sportsman, he is a member of the Drayton Valley Curling Club. He is a member of the Lions Club and other organizations in Drayton Valley.

GREEN ACRES

If You Want a Ram

All Shepherds are reminded that the Sheep Improvement Policy is being continued again this year during the growing season. By the Department of Agriculture. Under the Policy, which is divided into sections A and B, every commercial breeder is eligible to receive the government bonus on two approved rams purchased in each two year period. The bonus on Grade "A" rams is \$12.00 and on Grade "B" rams it is \$8.00. Section A of the Policy provides for placement of applications with the Department of Agriculture. Each applicant must purchase the ram and ship him, prepaid, to the buyer at cost less the bonus. For example if the Department paid \$12.00 for a grade "A" ram, the net cost to the eligible applicant would be only \$20.00.

Section B of the Policy provides for the same bonus on "A" grade rams and also "B" grade rams (\$12.00 and \$8.00) but the applicant purchases his own ram from an approved sheep sale. He must pay the full price of the sale but if at the same time, he completes an application for the bonus, it will be mailed to him after the application has been processed and verified by the Department. The Department does not provide prepayment of shipping charges on rams purchased under the B Policy.

Watch Those Shepherds!
Farm shepherds can't be plants that can make bookkeeping an unprofitable enterprise if not kept under control. All registered owners are checked periodically to see if they are free of disease, and also to advise bookkeepers on management problems. Unregistered bookkeepers miss out on keeping a shepherds' attractive and useful.

Sheep shepherds should also do it, should send their name and address and number of ewes and lambs to the Apis Branch, Alberta Department of Agriculture, Edmonton.

Side branches of trees extending into the fields should be cut back during the growing season. By this treatment, further branching is encouraged, and a denser, more effective wind barrier results. In the summer/autumn year, or after harvest, it is wise to sever those roots of established field shelterbelt trees that extend into the fields causing decreased crop growth. This can best be accomplished by placing a deep furrow along each side of the field shelterbelts at a distance from the trees equal to about one-half their height. A bumper plow, deep coupler or subsoiler can be used. After the furrows are made they can be filled in immediately. Such cuts will cause beautiful trees and useful shelterbelts for many years.

Notice to Bookkeepers
Every person keeping books in Alberta, whether only one colony at a large number, is required by the Bee Diseases Act of Alberta to register with the Apis Branch, Department of Agriculture, Edmonton. There is no charge for this registration.

The Apis Branch periodically sends information regarding beekeeping and disease control to all registered bookkeepers. These are registered under this valuable information.

Food for thought

By: Danita Boling.

It is hard to believe but here I am, based up in the new and very dignified Femina News Advertiser. I'm not quite sure yet, just how well my remodeling will appear in a newspaper but I am sure of the "big time". I had rather a strong attachment for our little home upon paper with its blunders and errors. In classic art work is the art and the theme of paper had together with a single staple. It served us well and I'm sure there is a feeling of nostalgia among us, in having to part with it. However these can be no progress without change and the Femina News Advertiser is now growing up to fit the needs of our town. It is going on annual subscription rate and can be had at more modest but it promises to be a good paper. News coverage will be increased. It will feature clear and more pictures, and the paper and print will be greatly improved. It will take awhile to get used to it but in order to keep up with all the activity and news of our area you will want to own a copy of it. We will all be very proud of it and all that it has to offer. In the small pilot paper, that preceded this edition, last week, I was absolutely delighted to see a few of Scoop's misprints and errors which will make us all feel more at home. Let's not get too perfect or grow up too fast. Scoop! One of your worst was last week was a real headache. It simply read, "Waste, . . . girls." What happened to the rest of it. Scoop, there must have been more to it than that! The least you can do is to tell us who paid for it. There are now a lot of wives throwing a glance of suspicion at their husband's direction! Keep up the good work, Scoop, let us have our laughs and we will all wish you the best of luck as your Femina News Advertiser grows and prospers!

Speaking of growth and development, it is a known fact that our local hospital is in drastic need of more room for additional beds. The occupancy has averaged almost 100% for the past seven months and patients are having to be discharged earlier than is deemed advisable in order to make the beds available for emergency cases. There is also a desperate need for a children's ward as a large percentage of the admitted patients are between the ages of a few months and 12 years of age. While Drayton's population is now at 4,000 people our child population compares with that of a town population of 6,000. More room and beds is the crying need right now. The original plan of the hospital was to be designed to the equipment located in sufficient to take care of the increase in bed capacity which means it would require very little additional outlay for more equipment. We now have clinic and the strong possibility of two more doctors establishing an office here which would certainly increase the activity on the present hospital facility. With more space and the construction of a big dam on the Brazos River within 35 miles of Drayton Valley, we can expect enough additional people in this area to really bring the hospital to the scene. Our Hospital Board wrote a request to the Provincial Government asking that they be allowed to increase the size of the Drayton Valley Hospital and the request was denied. I read the reply and it didn't make much sense to me as the Government had promised another hospital district nearby not to allow the hospital in Drayton any more money until they do something for the other district if and when it is necessary. Does that make sense to you? The Government recognized one immediate need but felt they must adhere to their promise to the other district. It seems to me as if a district such as ours, that provides such a tremendous source of revenue to the Provincial Government, should have a bit more consideration than that, but no matter how I feel about it there will be no money forth coming from the Government for our hospital needs. The hospital, now, are for the citizens of this district, themselves, to do something about it. Did I hear loud and painful groans from the rate payers? It is quite true that rate payers are called upon many times to carry a heavy load but actually the amount needed for the hospital addition is quite small and I doubt if it will be too long to the "over all tax picture". There are many improvements, three chiefly, that we would all like to have but let us take care of the first thing first. Let us not forget our basic needs. Health plus good care during an illness is as very important. Petitions in our local stores and at the hospital are for you to sign asking for the municipality to assist in raising funds to the hospital for the construction of an additional amount of space. Drop into one of the stores or the hospital and

add your name to the petition!! You will feel better for having done so and you will know that you have done your part toward providing adequate accommodations for those who are ill and need it. It could even be you, your children or any one in your family who will be solely in need of hospital care and who would benefit. Let's not deny this request because we are not frightened enough or because we are too selfish! Either McKenna at Ken's Mens Wear will be glad to discuss this with you further and answer any questions you may have.

Often when a friend is ill it is nice to send them a tasty meal and the following recipe is particularly good for that purpose as it can be treated as a regular fruit cake and used by the recipient when the appetite has improved enough to enjoy it.

Japanese Fruit Cake
Ingredients: 4 egg whites (beaten) one cup sugar, 4 egg whites (beaten), one pound almond (chopped), 1 lb. (if spiced) (all flavor) gum drops (cut) one fourth teaspoon (cut) 1/4 teaspoon (cut) 1/4 teaspoon (cut) one quart shelled whole pecans, 1/2 lb. glass pineapple (cut) 1/4 teaspoon each, of cinnamon, nutmeg, all spice and clove, 1 cup fruit, pinch of salt, and enough rum or rye to bind mixture to gather.

Mix the sugar with the well beaten egg yolks. Sift flour, salt and spices over the nuts and fruit, add the beaten egg whites and the rum or rye and mix the ingredients. Grease and line with paper, two 9x5x2 1/2 inch loaf pans. Bake one and one half hours at 275° in preheated oven.

"Our grand business is not to see what lies dimly at a distance, but to do what lies clearly at hand." Carlyle.

EDITORS NOTE:
The little old "Wanted: Girls," has a very precise explanation but we won't give it, as if we leave it go unexplained it may give Drayton Valley wives further "food for thought".

Annal: Now that you have looked over my article, what would you like to hear from me?
Henry: I think you had better play cards.

Comment: How can anything you could guarantee to make me only in the morning?
Annal: Yes, but I don't think the mother would like playing with him.

Let's decorate

with *Bellie Blight*

PATTERN:

TO HAVE OR HAVE NOT. This is a decorating problem. It didn't worry Grandma. The Victorian parlour was furnished with patterned Oriental rug, patterned damask drapery, patterned petit-point chair covers and carefully embroidered table linens. With pattern comes the danger of all in dull, dark colours. But our generation has been raised to appreciate simplicity. We have developed an enlightened love of clear, positive colour, and have already committed yourself to a cautious approach to pattern.

Every room has its own unique personality—but there are a few broad rules that are convenient guideposts.

The magic number three: three patterns and three colours. The average living room can accommodate a large pattern, a small print and a stripe. The same room will do well to be limited to a basic colour for large areas, a second major colour and an accent colour to add spice.

This sounds conflicting and, at first thought, the result would seem to be infinity in which to lose one's wits. Within this broad rule there is great scope. One woman will select a small provincial print drapery with plain walls and plain

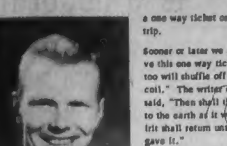

scatter rugs on a gleaming, waxed floor. Another homemaker will prefer solid colour drapes, a bold wallpaper mural on one wall, a striped chandelier. You use three colours might be gaily contrasting or subtly analogous.

The possibilities—even within the limit of these colours and three patterns—are endless.

You have flexibility in your accessories because they are more frequently changed. But a word of caution about selecting pattern and colour in major and permanent installations:

If, for instance, your rug is green and your drapery gold, you have already committed yourself to your two major colours for many, many years. You walk, then, should be a tint of either green or yellow-gold and not a third colour. The same caution should be applied to the smaller room. Select the ceramic wall tile in kitchen and bathroom to a solid colour. If you spot your tile with a second colour then, once again, you have committed yourself to two colours for a lifetime! So choose your permanent items (wall tile, flooring) in colours you know you will like with indefinitely—and think twice about introducing pattern to these areas.

"Point of No Return"

Pastor J. C. Welf, Drayton Valley, Church of God.

This is the first of a New Series by local church leaders. Others will follow.

We are at a point of change. This paper is changing to bring better news and advertising to your home and to this city. Drayton Valley is changing and I, being an old time citizen of ten months can see that. The town is always going through this area of point of no return. The town will no longer be a cross roads place but, if following the trend in which it is now in, it will continue to grow and expand as its population draws in "black gold" from the sub-surface.

The population has changed also, there is a point of no return for many people of this community. The life of the homemaker has been completely changed because of the new discoveries of resources in this area. Because of this some have moved away, some have decided because of the age to enjoy life right around them because they have prospered materially. Others are opening their new discoveries in clear land, and prepare for great advances in agriculture which tells that community growth will last and will continue to advance for many decades.

For something else has happened to individuals of this community. There are records of the past few years in my office telling me of young men who had a point of no return. Men who have been accidentally killed with the tools of their trade or on the highway. Really they have had a point of no return in their lives. They are no different than you except we have become stunned because of the reality of their Point of No Return.

In one issue of the Time magazine there appeared a full page of advertising of an insurance company with the heading of "It's enough, Point of No Return". The half page picture showed the wreckage of an automobile just before it hit a cable fence and crashed into the river from which neither it nor its occupants returned. In one way or another it has happened to many of this community. People who have taken their last ride. They started out as you and I start out expecting to reach their destination. Their friends planned to see them. They had hopes, ambitions, families, jobs, positions, and possessions. But they did not come back. Life gave them

positive in nature, willing to give, to go the extra mile. To serve instead of being served, there is a difference between a God centered community and an ungodly community.

The present life is important, it is probationary. It must be probationary. Life is one directional: you cannot reverse the past. There is no reverse gear. But you can change. You past wrong towards God and your fellowman can be blotted out. You can start anew and afresh.

Can we see them consistently and give forth to them the best in life, Christ Jesus? If we think that our physical body is all of our life, then the answer to the purpose of the meaning and the purpose of life is easy and simple. We are a fragment of a biological life. We are here accidentally, we are something but unperpetuated animals. We eat, drink and die. We shall be extinct. This is not a very inspirational philosophy and will produce low living where ever it is found. There is another set of answers to this important question. We are creations of God. We are here on probation to acquire moral and spiritual worth. We will finally return our bodies to the dust, our spirit to God.

The latter statement demands that this life have some meaning other than sheer existence. Surely God did not create the resplendent beauties of this earth nor did he create man "in his own image" and "in his own likeness" and then leave him to his own devices. We stand with in our world on a probationary period in which each man has an opportunity to prepare for a righteous, holy heaven or an unrighteous, unholy hell. God has given each man what no animal has—the sovereign power of will. Read on, you and only you will decide which course of activity you will pursue.

To every man there opens a "high way and a low. And every man decides which way his soul shall go. Our span of life limits our opportunities for preparation. We prepare here for life in the hereafter. Sin is that which prohibits our fitness for heaven. It is in this community to do just that. To help every man, woman, youth, boy and girl to find the right way of living. To lead God through his Son Jesus the Christ. People who live with God's will in the center of their lives are the hope of any community. They do not require extra law enforcement, etc. to keep the peace.

They are not negative sons of unrest, of destruction, but they are

positive in nature, willing to give, to go the extra mile. To serve instead of being served, there is a difference between a God centered community and an ungodly community.

B.V. Highlights
by Edith Doby

Mrs. Marion Kendrick will be flying "down home" to Maricopa, Arizona, for a month's holiday this fall.

Charles Macmillan's friends are sorry to hear that he has been on the sick list lately and wish him a speedy recovery.

James and Mary Thompson became parents on August 4 when Robin Kenneth arrived at the General Hospital, Edmonton. Congratulations follow.

Has any one smaller feathers burning? Mrs. Claude Frew had been out last week and would very much like to meet the chief.

Miss Rita Stephenson, of Regina, is visiting her sister and brother-in-law, Mr. and Mrs. Lynn Melson.

Mr. and Mrs. Jack Palla have just announced the arrival of their second chosen son, Gary Leone, a brother for Jeffrey.

Art Jorgensen has just completed a scholarship course in advanced mathematics at the University of Alberta. Art was one of fifty candidates chosen from a list which included many Alberta principals and superintendents.

Mr. and Mrs. Sandy Morrison visited with the Harry Zolmes' last week end. The Morrises were very active in community projects when they lived in Drayton Valley and will have a large circle of friends here.

Mr. and Mrs. Gordon Bowman and family will arrive for Calgary next week to make their home.

Both Mr. and Mrs. Bowman have worked hard for the betterment of the community and will be greatly missed.

BABIES BORN IN DRAYTON VALLEY HOSPITAL SINCE AUGUST 1st.

Aug. 2-Mrs. Fay Parker-girl, 5 lbs. 11 oz.

Aug. 2-Mrs. Margie Pringle-girl, 7 lbs. 8 1/2 oz.

Aug. 3-Mrs. Alberta Fletcher-boy, 8 lbs. 11 oz.

Aug. 4-Mrs. Darlene DeCook-boy, 7 lbs. 3 3/4 oz.

Aug. 4-Mrs. Mabel Anderson-boy, 6 lbs. 14 oz.

Aug. 7-Mrs. Betty Harris-boy, 6 lbs. 5 3/4 oz.

Aug. 8-Mrs. Dolores Shrybel-boy, 8 lbs. 3 oz.

Aug. 9-Mrs. Shirley Benson-boy, 6 lbs. 7 1/2 oz.

Aug. 10-Mrs. Hazel Schurer-boy, 7 lbs. 13 oz.

Aug. 10-Mrs. Clara Allen-boy, 8 lbs. 1 oz.

Aug. 10-Mrs. Angeline Hatt-girl, 6 lbs. 10 oz.

Aug. 13-Mrs. Justice Lambert-boy, 8 lbs. 10 oz.

Aug. 13-Mrs. Gladys Stec-girl, 6 lbs. 10 oz.

Aug. 14-Mrs. Edna Wallace-boy, 7 lbs. 8 oz.

DON'T FORGET OUR

JACKPOT BINGO

Every Wed. night in the Elks Community Hall at 8:00 p.m.

Sponsored by the B.P.O.E.

"NEW NATIONAL POLICY-A Vibrant Reality"

Extracts from a speech made recently by the Rt. Hon. John G. Diefenbaker at a Testimonial Banquet in his honour, Montreal.

There still lies ahead of us a great task to communicate Conservatism and what it stands for to all Canadians with far more vigour, skill and enterprise than has been shown in the past. The Conservative Party has played a major role in the history of our country...

...but as the natural and inevitable product of a political philosophy whose foundations were well and truly laid by Sir John A. Macdonald and Sir George Etienne Cartier.

Our Party was founded, as Sir John A. himself said, as "a Progressive Conservative Party which will embrace all the progressive changes in the country."

It was created to achieve what Sir George Etienne Cartier described as "a new nationality—a political nationality, independent of the national origin and religion of individuals."

"In our Confederation," he said, "there will be Catholics and Protestants, English, French, Irish and Scotch, and each by its efforts and success will add to the prosperity of the Dominion and to the glory of the new Confederation. We are of different races, not to quarrel but to work together for the common welfare."

The appeal, above all else, is for a united response to great issues facing Canada as the true and traditional pattern of nationhood. It would, indeed, have been a hollow victory for the Conservative Party if it had been otherwise on March 31st of last year.

Over a long period of time our opponents cultivated a political pattern in Canada which was very different from that of Macdonald and Cartier. History, in the long view, will surely lay the responsibility for Canadian disunity in those years exactly where it belongs—on the doorstep of the Liberal Party and its policy of Divide and Rule.

It is our major responsibility to make sure that such divisions do not occur again. It will not matter very much how great the material progress is in any section of Canada if that progress is not accompanied by a steadily increasing unity of spirit.

Conservatism has become the symbol of that special kind of Canadianism which believes in

unity rather than division; in development rather than retrenchment; in the advancement of the common rather than special interest; in the abiding principles of human dignity and human betterment; in ONE CANADA and one Canadian nationality.

Because of the long Liberal interval between 1935 and 1937, I think it is important for us to stress at this time the continuity of policy over the years, so that all Canadians may come to understand the wealth of tradition and experience which is the foundation of Canadian Conservatism.

For best results in pickling, it is advised to use a modern recipe rather than one which may have been handed down in the family. There is a reason for this. Today's ALUM vinegars have a slightly higher acid content than those used a generation ago. Older recipes are likely to call for too much vinegar or salt in a batch or to be discouraged. The originators of pickling can be helped by using a good VINEGAR.

There are four kinds of vinegar: white, cider, blended and wild. White vinegar gives better color when light colored foods such as cucumbers, are pickled. Cider vinegar is used when a special flavor is desired. A blended vinegar is usually made by combining about equal quantities of white and cider vinegars.

White vinegar gives better color when light colored foods such as cucumbers, are pickled. Cider vinegar is used when a special flavor is desired. A blended vinegar is usually made by combining about equal quantities of white and cider vinegars.

Silver Wedding Anniversary

Mr. and Mrs. Kazan

Elba Community Hall in Drayton Valley was the scene for the celebration of the silver wedding anniversary of Mr. and Mrs. Basil Kazan, who were married in Anderson, Alberta 25 years ago.

They have resided in Drayton Valley for twelve years. Mrs. Kazan was born in Poland, and Mr. Kazan was born in Canada, both are Ukrainians. There are four girls and one boy in the family, the two eldest girls, Gladys and Marie, are both married. Patricia and Marie and the boy, Zenor. The surprise affair was put on by Patricia, assisted by Marie.

The couple were genuinely surprised. Patricia had arranged to make the event a surprise for her parents, and Roydon Urchynson was taken into the plan and he was able to get the couple to come to the hall, where they were quite surprised to see a group of friends gathered and to find the hall very tastefully decorated.

TO THE GRADUATES OF '59

By Charlotte Kay

Don't say you CAN'T until you can prove you can't! This advice was given by a prominent head leader many years ago. It should be placed in front of every desiring table and shaving mirror, as a challenge to each new day. How many times are we faced with discouraging failures and are tempted to say "I can't." Yet if we can but muster that last ounce of strength, make one more try, one more fresh start, our failure becomes success.

If beating and best had listened who when people said, "You can't", it would not be possible for diabetics to live normal lives. Or if Dr. Jonas Salk had given up the first time the vaccine was not all he expected, the dreaded polio would still be rampant.

Canada is a young country, a land of opportunities. Graduate of '59 accept the challenge of the future; put forth every effort to attain your ambition and don't say you CAN'T until you can PROVE you can't.

NEWS NOTES.

Gladys and Bernice von Tottenborn returned recently from a vacation trip which took them to Fairbanks, Alaska, Dawson City and the Klondike country. Bernice reports that conditions are very bad on the highway.

Four unattached D.V. Males returned recently from an extended trip, part of which took them through Montana. The four: Don Crichon, Bill Bromley, Al Balkowski and Mary Jones. To Vancouver and return was the itinerary. The boys claim that their trip though had nothing to do with the lamentable earthquakes which have taken place in Montana.

Public Notice

Notice is hereby given that the Council of the Town of Drayton Valley proposes to pass a By-Law No. 183 of the said Town being a By-Law to amend By-Law No. 91 being the Zoning By-Law of the said Town.

That By-Law No. 183 authorizes the Council of the Town of Drayton Valley to amend By-Law No. 91 as follows:

1. Lots 25 and 26 in Block 1 Plan 239 KS be changed from Low Density Commercial to Town Classification.
2. That that portion of the SW of Sec. 16 Twp. 49 Rgs. 7 West of the 5th meridian lying to the North of Block 10 in Plan 170 KS in Drayton Valley and tentatively proposed for sub-division as Residential Lots be changed from Agricultural classification to Low Density Residential Class "A".

A copy of the said By-Law and the Map of the proposed area may be examined at the Town Office during regular business hours. A Public Meeting will be held in the Town Office at 10.00 A.M. on the 5th day of October for the Council to consider any objections, complaints or recommendations pertaining to this amendment.

THE TOWN OF DRAYTON VALLEY
W.G. Johnson,
Secy-Treasurer.

JACK AND JILL KINDERGARTEN resumes Sept. 1st for the 4th consecutive year in Drayton Valley. The teacher has had three years kindergarten experience in this community. This kindergarten is a member of the Calgary Kindergarten Association and uses the curriculum set forth by the Alberta Dept. of Education. Along with our usual daily music classes at the piano there will be a rhythm band this year. Large well equipped classroom. Outdoor play equipment for outdoor activities. Limited enrollment. For further information phone Mrs. Bradford 280.

Town Manager's Report

Dear Ratepayers:

I have just returned from Edmonton where I attended the first part of the Board of Public Utility Hearing into the setting of the Gas Rate Increases as proposed by Northwestern Utilities. These increases were submitted earlier in the year by a Board of Public Utility Order which was issued after the hearing of the first Phase of the Gas Rate Inquiry. That order authorized the company a general increase to recover their costs and to earn 1 1/2% on their investment.

At this point the second phase hearing necessary, which involved the setting of a new rate to bring the earnings of the company into line with that allowed by the Board Order and to change the system of billing from M. C. P. to Thermal.

300 Therms = 20 M.C.P. of 968 B.T.U. Natural Gas

The following is a comparison for a two bedroom home for the locality indicated as set up in the proposed rate schedule. (cont. below)

	PEMBINA	10¢ PER COPY
NEWS ADVERTISER		

Vol. 4 No. 34 August 27, 1959 A. Playford, Publisher Box 120, Drayton Valley.

	Schedule	Old	New	Per M.	% Increase	Old Rate Above Edmonton	New Rate Above Edmonton
Edmonton	3/240	35	30/800	3.54	0.13	30.3	13.1
Vergoville	3/250	32	30/800	3.64	1.10	14.15	29
Drayton Valley	2/250	48	30/800	3.54	.65	7.5	44.3
Edson	2/250	80	30/800	3.74	—	.00	80.1
Stony Plain	2/250	85	30/800	3.54	2.35	36.9	71.5
Hinton	2/300	75	30/800	3.04	1.15	8.0	136.1

The Main reason for the increase in Local Rates is the increase in the cost of Gas and that the company was a bit optimistic in setting the rate when service was commenced. You will recall that when the Franchise was voted on it quoted a Rate of 85¢ per M.C.P., that price was reduced to 45¢ before service was commenced. The Rate is now being increased by approximately 7.5 per cent on the average.

You Mayor and myself had quite a lengthy meeting with the senior officials of Northwestern Utilities, at that time we pointed out the growth our Town is experiencing this year and how it was affecting the population density. They agreed with us that our picture was changing each month and they assured us that although the new rate was only producing 98% of the permitted revenue, that this should change and that the company will review the situation early in 1960, and if the rate of return at that time warrants they will make an adjustment.

I realize that any rise in living costs are disappointing to us all and I hope you will accept the assurance of your Council and myself that we are doing our utmost to make your Town a better place to live.

Should that be any question that you would like answered at anytime regarding this or any other Town Business, please do not hesitate to come into the office or phone in at 10. That is the only way we can serve you best.

T. B. Cummings,
Town Manager.

Unitization Effective September 1st

"HEALTH PLAN" FOR PEMBINA FIELD WILL UP PRODUCTION, PROLONG LIFE.

By: Ron Kennedy.

A new health plan for the Pembina oilfield, to go into effect September 1, is expected to extend the life of Canada's largest oilfield from the year 1950 to about the year 2000.

The alkali to be administered to the field is to be a mixture of propane and butane (commonly called LPG's) and dry natural gas. The propane and butane will be mixed in about 50-50 quantities.

Besides extending the life span of the field, the program as a miscible flooding will mean that instead of only 40% of the oil in the field ever being produced, 10% will now be recovered.

LARGEST PROJECT. It is believed to be the largest miscible flooding program ever to have been undertaken. At present water injection is being used to aid in the recovery of oil, but the water only pushes the oil ahead of it and does not get into the "hard to get at" oil bearing pores. With water, only a 60% oil recovery could be expected, and the life of the field would be doomed in about the year 2000.

An engineer for Mobil Oil of Canada, Ltd. which is to be (continued next column)

Lion Presidents Change

LION PAST PRESIDENT (for the 1958-59 term) DUNC. LABELLETER HANDS THE PRESIDENT'S GAVEL OVER TO LION PRESIDENT DON-MCKENZIE (1959-60 term).

The picture was taken before the Banded and Bearded Lions were much in evidence, as may be seen by Lion Chalk Dism in the rear. Bringing up the rear, also, is Lion Carmas Fairman.

Sports

By: Gene Baley.

The oil will absorb about 60% of the LPG's and the gas 40%. The LPG's do not have to be removed from the oil as they actually improve its quality.

The Pembina field will always produce enough natural gas for the project, but in about a year's time, the LPG's will have to be purchased from neighboring fields such as Bonnie Glen and perhaps Innisfail.

Laboratory studies of the project began several years ago, and a pilot plant was later built in the field. About \$600,000 was spent between December, 1957, and October, 1958 in preparing for the scheme.

The miscible flooding program was made possible by the recent voluntary unitization of part of the Pembina field. Unitization means that all those with interest in the field share in expenses and returns, proportional to their holdings, under one common operator.

About 90% of the 22 companies operating in the unit area will be participating in the unitization with Mobil Oil as operator.

There are 553 oil wells in the North Pembina Cardium Unit #1, of which Mobil Oil owns about a third.

The same operators participate in a gas processing plant in the field, which will produce the natural gas and some of the LPG's needed for the miscible flooding.

Under present production allowances Pembina is producing about 85,000 barrels of oil daily, or more than double the next largest producing field.

There are 29 working interest owners in the unit. In order of interest they are: Mobil, Standard, Pacific, Honolulu, Ohio, Cal Standard, Hones, United, Amiteco, Foothills, Trans Border, Bayval, Climax, Coppermine, San, Phillips, Lobson, Lucas, Dome, West Can, French Petroleum, Hudson's Bay, Winthall, Westburne, Amark, Murphy, Ashland and Union.

This week the sports picture in Drayton Valley featured two play off series. One series saw the Mobil Oil Pony League entry win the series against the MacCalder entry (known as Drayton Valley). The other series was in the Farshaw League.

The Pony League played their first game on Sunday. The final score was 19-4 in favor of Mobil Oil in a game which included enthusiasm on all sides. At times it appeared as if the MacCalder boys just didn't care.

The second game, played Tuesday, was a complete reversal. The final score was 14-4 in favor of Mobil Oil in a game which included enthusiasm on all sides. At times it appeared as if the MacCalder boys just didn't care. The game was a real battle to win and was up against a really tough team. The second game had to be called after six innings due to the rain. Then the Pony League title went to Mobil Oil for \$8.

On the farshaw scene, the final series will have already started by the time this article is published, but we urge all readers and anyone else interested in an hour and a half of good entertainment to turn out on Monday, Aug. 31 to see the second game of the best-of-five series final.

In one end of the series, last week, Pan Am. and Supply managed to squeeze in 2 games between the rains. Pan Am. knocked over their opponents in 2 straight games. The series was highlighted by the superb fielding of the Pan Am. team. One spectator was overheard to say that "Pan Am is playing a way over their head," nevertheless, they did field the ball very well. In summation the series was essentially between a fine pitcher, Ralph Burford, and a superb fielding team.

In the other series, Collard took advantage of the absence of MacCalder's pitching ace, Jones, to come up with a 12-4 win over them in the first game.
